

ADJUSTABLE LED LINEAR HIGH BAY SENSORS AND EM

86-209 Emergency Battery Backup
86-210 Microwave Sensor
86-211 PIR Sensor

INSTALLATION AND SAFETY INSTRUCTIONS

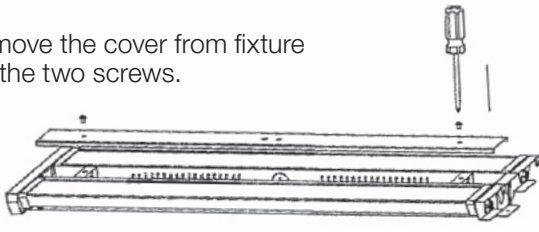

IMPORTANT: Read before installing fixture. Retain for future reference.

MICROWAVE AND PIR SENSOR INSTALLATION

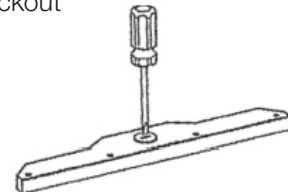

STEP 1: Remove the side panel from fixture by removing the four screws.

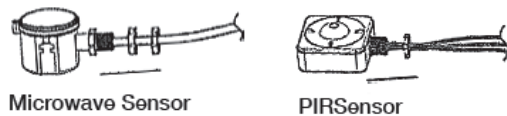

STEP 2: Remove the cover from fixture by removing the two screws.

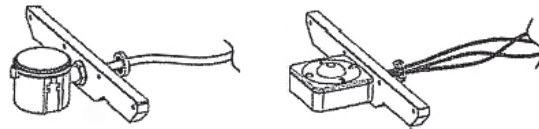

STEP 3: Remove knockout on the side panel.

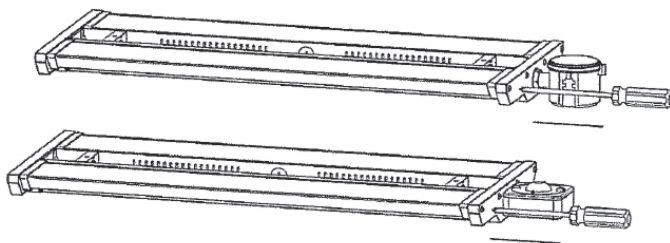

STEP 4: Take one of the nuts off the sensor.

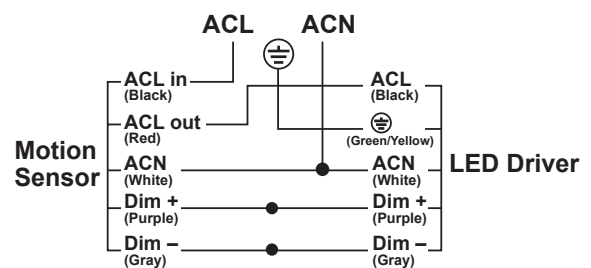

STEP 5: Install the sensor to the fixture side panel.

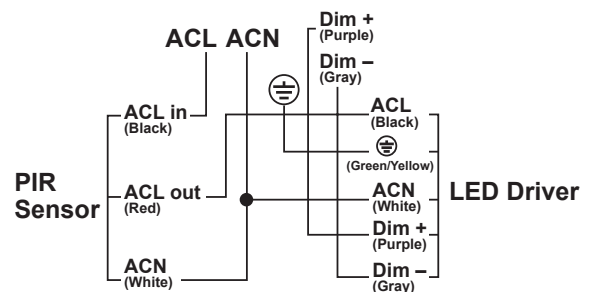

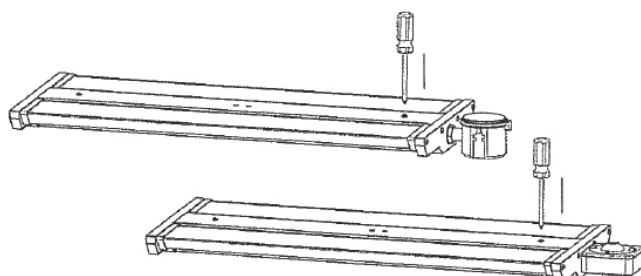

STEP 6: Reinstall side panel with sensor.

STEP 7: Follow wiring diagram accordingly.

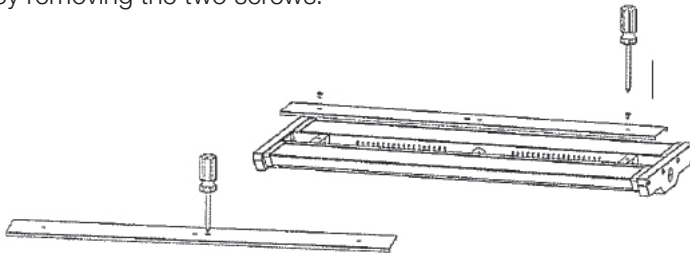

STEP 8: Reinstall fixture cover by using the two screws.

EMERGENCY BATTERY BACKUP INSTALLATION

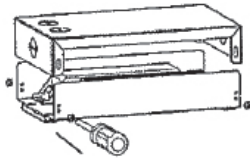

STEP 1: Remove the cover from the fixture by removing the two screws.

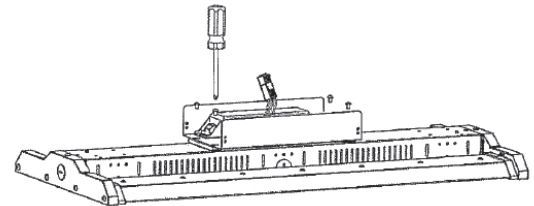

STEP 2: Remove the two knockouts on the back plate and pull the power leads through the holes.

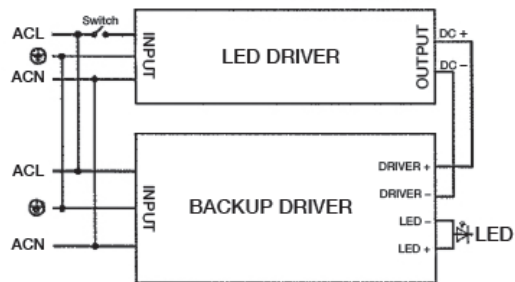

STEP 3: Remove cover from the Emergency Battery kit by removing the four screws.

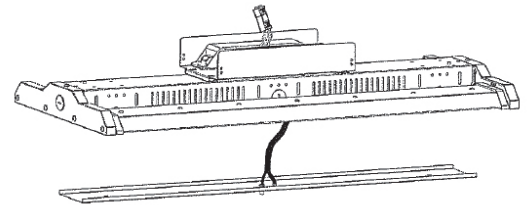

STEP 4: Align the Emergency Battery kit to the fixture and secure to the housing with hardware provided.

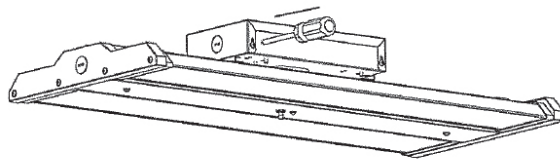

STEP 5: Follow wiring diagram accordingly.

STEP 6: Install battery test button and indicator light to fixture bottom cover.

STEP 7: Reinstall Emergency Battery kit cover using the four screws.
